## ABOUT US

Fsilon has been deeply rooted in the home building materials industry since its founding in 2005. With two decades of expertise, the company proudly debuted on the Shanghai Stock Exchange A-share Main Board (Stock Code: 605318) in August 2020. As a pioneer and leader in the industry, Fsilon is an eco system-driven industrial enterprise integrating product R&D, supply chain empowerment, personalized customization, and turnkey project delivery.

Headquartered in Haiyan, Zhejiang, the company operates across a 260,000+ sqm campus, with its business spanning diverse sectors such as: Cultural tourism facilities, Public welfare projects, Mobile commercial solutions, Municipal infrastructure, Rural revitalization, Military, medical, and beyond. Through independent innovation, Fsilon has introduced cutting-edge, highly customizable products, including: All-terrain adaptable "Space Capsule" and "Apple Capsule" units Modular prefabricated buildings.

Empowered by professional excellence and innovative spirit, Fsilon fuels dynamic growth across industries.

# All-terrain adaptation

“Never miss” the beautiful scenery of the mountains, rivers and lakes.

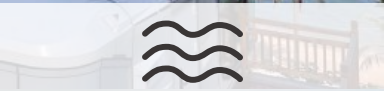

Mountains

rocks

snowfields

coasts

deserts

# DRIVEN BY INNOVATION PRODUCT UPGRADES DOUBLE IN VALUE

From manufacturing to intelligent manufacturing, Fsilon has been practicing the development concept of "innovation" all the way, providing core protection for the long-term prosperity of the enterprise.

Fsilon has the strength of a first-line brand in the industry, far surpassing many brands in the industry in terms of product research and development, design, and manufacturing levels. Driven by technological innovation and focusing on improving the "internal strength" of products, the spirit of craftsmanship and the pursuit of excellence in quality are reflected in every detail, from the selection of auxiliary materials, manufacturing processes, power optimization to product performance.

# CATALOGUE

**Fsilon Make Space Smarter**  
**Provide Prefabricated Materials and Modular Solutions**

In recent years, the upsurge of container modification has been in full swing. More and more people are getting involved in it, building their own container villas with extremely limited budgets.As important innovative forms in the field of modern architecture, the market prospects of prefabricated container houses and expandable houses are driven by policies, technologies, environmental protection requirements and diverse application scenarios,showing strong growth potential.

The House from the "Future" — The Space Capsule **P.06**

The Ideal Choice for Mobile Living — The Apple Pod **P.28**

## Reimagining the Future of Living:: Discover the Boundless Appeal of Space Capsule Dwellings

At the intersection of technology and creativity, humanity's vision for living spaces has shattered conventional limits. Born from aerospace inspiration, the space capsule design is quietly spearheading an architectural revolution.

More than just embodying mankind's cosmic dreams, it fundamentally redefines the concept of "home" through: Unmatched functionality - Seamlessly adapting to urban, rural and extreme environments, Groundbreaking innovation - Merging space-age aesthetics with intelligent living systems, Eco-conscious engineering - Pioneering sustainable closed-loop life support technologies, A bold testament to human ingenuity that bridges our earthly existence with stellar aspirations.

## "Old Maps Won't Lead You to New Worlds" - Fsilon Space Capsule

Amid the dual tides of the "Experience Economy" and "Low-Carbon Revolution", the prefabricated construction industry is undergoing a structural transformation driven by both technology and ecology. Fsilon's "Space Capsule" series embodies this shift with its core philosophy of "Technology + Ecology".

The Space Capsule is an innovative, compact living space built around modular design—blending futuristic aesthetics with practical functionality.

Inspired by humanity's yearning for space exploration and visions of tomorrow, it represents a radical rethinking of habitation.

Why It Stands Out:

Rapid Deployment – Utilizes cutting-edge construction tech and materials for quick assembly with minimal land/resource requirements Fully Customizable – Adaptable configurations to suit diverse living needs and scenarios Sustainable by Design – Aligns with global decarbonization goals through eco-conscious engineering This isn't just a dwelling—it's a manifesto for how we'll live next.

# Embark on a Cosmic Drift You, the Space Capsule, and the Edge of the Universe-Time Continuum

## ► Modular Design Activates Idle Resources

Our space capsules feature factory-preassembled, plug-and-play modules requiring no permanent land allocation.

They deploy instantly across diverse environments—scenic areas, countryside retreats, mountain forests—transforming underutilized spaces into experiential habitats.

## ► Low-Carbon Economy Powers Sustainable Futures

Advanced Exoskeleton: Curved aluminum panels + flame-retardant composites deliver : 10-year waterproof guarantee 97% material recyclability 40%+ lower carbon footprint vs traditional construction.

## ► Tech-Infused Experiences Drive Loyalty

Immersive Space IP Environment: AI voice control & smart security systems Floor-to-ceiling panoramic windows"Dual Silent Realm" acoustic engineering (90dB external noise reduced to <40dB inside) Proven Impact 52% improvement in sleep quality satisfaction 35% increase in repeat bookingsThis isn't accommodation—it's a rebellion against terrestrial limits.

**[10-Yr Waterproof] [97% Recyclable]**  
**[40%+ Carbon Reduction][52% Better Sleep] [35% More Rebookings]**

Product Brand: Fsilon  
Model No.: HWT KH-01-1  
Dimensions:  
Length: 9500mm  
Width: 3300mm  
Height: 3200mm  
Footprint: 31.4m<sup>2</sup>  
Occupancy: 2 persons  
Max. Power: 7.5KW/12KW (with floor heating)  
Net Weight: ≈7 tons

Fsilon Overseas Department  
Official Tel: +86 573-8659 8806  
Website: <http://fsl-bm.com>

Standard Configuration Includes

Indoor decoration	Enclosure System Specifications	Furniture
Integrated ceiling & wall modules	Galvanized steel frame system	wardrobe
SPC flooring	Fluorocarbon-coated aluminum alloy shell modules	bar counter
Bathroom Privacy glass door	Waterproof, thermal insulation assembly	
Bathroom Marble/ceramic tile flooring	Triple-panel tempered glass windows	Product accessories
Vanity with basin & mirror	Laminated tempered glass skylight (3-layer)	Support feet matching the bottom of the product
Accessories (robe hooks, shower shelf, towel rail)	Eco-friendly thickened polyurethane insulation system	Lifting rings / transportation fixing parts /
Sanitaryware (toilet, faucets, shower, drain)	Baked enamel stainless steel hinged entrance door,	transportation packaging
Central lighting system	panoramic balcony	
Complete plumbing/electrical network		
Blackout curtains (standard colors)	Guest room control system	Value-added configuration
Split-type air conditioner (cooling/heating)	Card-insertion power-on /off panel	Electric auxiliary heating system for water supply pipes
Electric water heater	Multi-scenario mode function panel	Induction cooker / range hood
Energy recovery ventilator (ERV)	Intelligent integrated control of lighting / curtains	Mini refrigerator
Full-house window screens	Intelligent voice control	Customized furniture: cabinets / wall cabinets
Electric floor heating	Hotel intelligent access control	Bathroom heater with three-in-one
		Entrance staircase

## Apple Pod

### Walking integrated house

New generation prefabricated micro – villas  
 “Apple pod” creative architecture  
 With a unique and full – bodied appearance  
 Breaking the traditional house shape  
 It has also attracted the attention of a large  
 number of young people.

## Experience the Dual Allure of Nature and Comfort

### – Fsilon Apple Pod

The Apple Pod, an innovative product in the realm of mobile smart cabins, derives its name from its striking resemblance to an iPhone. Evolving into a stylish, cost-effective, and easily deployable next-generation smart solution, it has gained widespread popularity among younger demographics. Its applications span: Resort hotels & glamping sites, RV campgrounds, Creative commercial complexes, Pop-up retail spaces. Fsilon’s deep expertise in spatial aesthetics drives our mission to unlock the Apple Pod’s limitless potential across scenarios. Key features include: Aerospace-grade aluminum construction. Sleek, minimalist design with futuristic appeal. Fully customizable interiors for diverse needs.

# Compact Size, Boundless Potential

## Eco-Materials Powering Low-Carbon Architecture Where Innovation Meets Value

The Apple Pod's modular design revolutionizes outdoor space utilization, enabling rapid deployment of temporary or flexible spatial solutions. Its core advantages include:

### Biophilic Design Intelligence

The design may incorporate green and environmentally friendly elements, such as green plant walls, small greenhouses or air purification systems, to create a natural micro-environment similar to an "apple orchard".

### Agri-Tech Synergy

Or combine micro-planting technologies (such as hydroponics, vertical farms) to realize the integration of vegetable and fruit planting and living functions within the living units.

### Sustainable Modular Engineering

The modular advantages of the affiliated unit houses are continued. Renewable materials or low-carbon construction technologies are adopted to emphasize the concept of ecological cycle.

### Transformative Applications

Urban Farming Labs: Deployable R&D stations for agricultural startups  
Edu-Tainment Pods: Interactive sustainability classrooms  
Micro-Retail: Zero-waste pop-up stores with harvest-to-table displays

# "Apple Pod" Mobile Space

## Empowering Mobile Commerce

The Apple Pod is ideal for commercial events, exhibitions, conferences, and more. Its flexible layout and customizable design allow tailored setups to meet diverse event requirements, providing versatile solutions for business and social engagements.
